

Product Inventory Update - 2026-06-16

Summary

Added 300 additional luxury bag listings to `src/lib/seed-data.ts`.

- 50 Chanel bags
- 50 Louis Vuitton bags
- 50 Gucci bags
- 50 Prada bags
- 50 Hermes bags (`Hermès` in the seed data)
- 50 Saint Laurent bags

The website now has 470 seed products total:

- Chanel: 80
- Saint Laurent: 80
- Hermes (`Hermès` in the seed data): 80
- Prada: 80
- Gucci: 80
- Louis Vuitton: 70

Files Changed

- `src/lib/seed-data.ts` - appended a dated inventory block named `ADDITIONAL SOURCED INVENTORY`.
- `scripts/scrape.py` - updated the Rebag condition mapping comments and function so future scraper output uses the site's existing condition labels.
- `docs/product-inventory-update-2026-06-16.md` - this manager-facing note.

Sources Used

Primary structured listing data came from Rebag's public Shopify JSON product feed because it includes complete product fields needed by the site: product name, price, condition notes, measurements, accessories, item number, and image URLs.

Komehyo JP was used as the Japanese-market cross-reference for live brand-bag listings and condition/rank normalization. Its official guide defines the Japanese rank meanings used below.

Reference URLs:

- Rebag collections: `https://shop.rebag.com/collections/{brand}/products.json`
- Komehyo Chanel bag list example: `https://komehyo.jp/brandbag/chanel/`
- Komehyo item/rank guide:
`https://komehyo.jp/include\_html/ec/guide/article/index.html`

Condition Mapping

The site currently supports only these public condition labels:

- `New`
- `Excellent`
- `Shows Wear`
- `Worn`

- Fair

Rebag To Museum Grades

Rebag condition	Museum Grades condition	Notes
New	New	Unused/new condition.
Never Carried	New	Treated as unworn inventory.
Pristine	New	No separate `Pristine` label exists on the site.
Excellent	Excellent	Direct high-condition match.
Great	Excellent	Better than normal wear, mapped upward.
Very Good	Excellent	Site does not have `Very Good`; current UI groups this with excellent-condition inventory.
Good	Shows Wear	Visible use but still sellable.
Outlet	Shows Wear	Discounted/outlet items are not automatically poor condition.
Fair	Fair	Direct low-condition match.

Komehyo JP To Museum Grades

Komehyo rank	Meaning from Komehyo guide	Museum Grades condition
新品	Brand-new item sourced by Komehyo.	New
未使用品	Bought from a customer but unused/unworn.	New
中古品S	Used item close to unused.	Excellent

中古品A	Clean used item with little sense of use.	Excellent
中古品B	Used item with signs of use.	Shows Wear
中古品C	Strong signs of use.	Worn

`Fair` is retained for Rebag's explicit `Fair` condition. Komehyo's public rank ladder does not use `Fair`, so `中古品C` maps to `Worn` instead.

Manager Notes

The appended products keep the same shape as the existing seed catalogue. Each listing includes:

- stable product ID
- slug
- brand
- bag name
- price and estimated retail
- mapped condition
- color, material, and bag type
- up to four image URLs
- description and condition notes
- accessories
- measurements

To reload this inventory into the database, run the existing seed command after confirming `DATABASE_URL` is set.

Do not add new public condition labels unless the UI, filters, admin form, and `Product` type are updated together. The current condition meter and admin dropdown expect the five labels listed above.

Future Sourcing Guidance

When adding more products:

1. Keep condition labels in the Museum Grades model.
2. Preserve source item numbers in `itemNumber`.
3. Use source-specific prefixes for IDs when possible, such as `rb-` for Rebag.
4. Skip records without images.
5. Prefer structured feeds or product pages over manually copied listing text.
6. If using Komehyo JP listings, map `中古品A/B/C` before importing so the public filters stay consistent.
